

UniPath AI

The Intelligent Bridge to Global Education for Iraqi Students

1. THE PROBLEM

Every year, thousands of Iraqi and Arab students struggle with a fragmented admission process. Barriers include non-standardized GPA systems, lack of localized payment methods (ZainCash), and high uncertainty regarding visa accessibility and university matching.

2. THE SOLUTION

UniPath AI is an end-to-end intelligent platform that automates the journey from a local transcript to a university acceptance letter.

Smart Matching

AI-driven normalization of Iraqi % to Global 4.0 GPA scales with "Safe/Target/Reach" categorization.

Auto-Fill Engine

One-click document parsing (OCR) and automated form submission for Western and regional portals.

3. CORE TECHNOLOGY STACK

- **Computer Vision:** Advanced OCR for Arabic/English certificate parsing.
- **LLM Agents:** Tailored Personal Statement & CV generation.
- **Geo-Intelligence:** Ranking based on "Practical Proximity" (Flights, Visa ease, Cost).
- **Local Fintech:** Deep integration with ZainCash and QiCard API.

4. BUSINESS MODEL & MARKET

Primary Revenue: Nano-transactions (2,500 - 10,000 IQD) per scan/auto-fill.

Secondary Revenue: Referral commissions from partner private universities and B2B licenses for education consultants.
